- 1) Include Excess UICs in Monthly Readiness Reporting (SCR# 1517):**

The 2406 module has been enhanced to comply with the upcoming changes to AR-700-138. Excess UICs can now be included in the monthly RIDB readiness reporting. All UICs within the open plan will be available for selection. Excess UICs should be configured as Battalion UICs within the Unit table, or as directed by ASC. When part of a reporting rollup at the Battalion or Brigade level, Excess and MTOE (authorized) UICs will be rolled into the same report, however, system validation will not be performed for excess UICs.
