

# AWRDS 2006v1.1.3 Release Notes

## AWRDS 2006v1.1.3 Release Notes

31 January 2007

---

### Release Overview

---

The 2006v1.1.3 patch release is designed to resolve existing issues to the AWRDS system. This patch is designed to be installed on the existing 2006v1.1.2 release. This patch is to be applied manually by a SAI site representative on client machines only. The affected modules will include Personnel Accounting and Work Orders.

### Resolved Issues

---

- 1) **Incorrect dates added (2555):** The system was not automatically populating '0' hours for designated holidays and weekends. This would cause the system to prompt the user to enter labor hours against a Work Order in both the Work Order and Personnel Accounting modules.
- 2) **Summary window uses current year to determine a holiday (2557/CEG-E):** The summary window in the Personnel Accounting module was using the current year to determine Holidays even if the summary was for the previous year. For example: If the current date is Jan 07 and the summary was for Dec 06 the system was looking at Dec 07 for the designated Holidays.
